About Us

Yuan Limited is a Kenya-based enterprise operating across three critical sectors: copper mining and mineral development, renewable energy and solar power solutions, and strategic supply to government, defence, and security institutions. This diversified positioning allows us to serve the infrastructure, energy, and procurement needs of both public and private sector clients under one roof.

Across every division, our approach is guided by modern technology, strict safety and quality standards, and responsible, compliant operations. We partner with internationally recognized manufacturers and technical partners to ensure the products and services we deliver meet the standards our clients require.

| Our Approach

- Modern technology and industry best practice across all divisions
- Strict safety, quality, and regulatory compliance standards
- Responsible environmental management in all resource-based operations
- Professionalism and confidentiality in government and institutional engagements

Our Services

01 — Copper Mining & Mineral Development

Exploration, extraction, processing, transportation, export facilitation, and environmental rehabilitation — delivering copper and mineral resources that support Kenya's electrical, construction, telecommunications, automotive, and industrial sectors.

02 — Renewable Energy & Solar Power Solutions

Utility-scale solar development, EPC services, grid connection infrastructure, energy storage, and independent power production — contributing reliable renewable energy to Kenya's power infrastructure.

03 — Strategic Government & Defence Supply Solutions

Specialized equipment, systems, and logistics solutions for government institutions, defence organizations, security agencies, and law enforcement — from tactical equipment to medical supplies, food, and procurement support.

The following pages detail each division's capabilities.

Copper Mining & Mineral Development

Yuan Limited is involved in the exploration, extraction, processing, and supply of copper and other valuable mineral resources within Kenya. Our mining operations are guided by responsible environmental management, modern extraction technologies, and strict safety standards.

What We Offer

- Geological exploration & resource assessment
- Mine planning
- Copper ore extraction
- Processing
- Transportation & logistics
- Export facilitation
- Environmental rehabilitation

Industries We Supply

- Electrical infrastructure & power transmission
- Construction & real estate development
- Telecommunications
- Automotive manufacturing
- Industrial manufacturing

Why It Matters

Copper is foundational to modern infrastructure and the global energy transition — from power grids to electric vehicles to renewable energy systems. Yuan Limited's full-spectrum approach, from exploration through export, positions us as a reliable partner for industrial buyers and investors in Kenya's mineral sector.

Renewable Energy & Solar Power Solutions

Yuan Limited develops and operates solar energy projects that generate clean electricity for commercial, industrial, and public utility applications, contributing reliable renewable energy to Kenya's power infrastructure.

What We Offer

- Utility-scale solar farm development
- EPC (Engineering, Procurement & Construction) services
- Grid connection infrastructure & substations
- Power transmission
- Energy storage solutions
- Plant operation & maintenance
- Independent power production (IPP)
- Energy-efficiency consulting

Who We Serve

- Commercial & industrial energy users
- Public utility & grid infrastructure projects
- Public institutions (schools, hospitals, county offices)
- Independent power production partners

Why It Matters

As Kenya's energy demand grows, reliable and sustainable power is critical to industrial competitiveness and public service delivery. Yuan Limited's end-to-end solar capability — from EPC delivery through ongoing plant operation — supports that transition.

Strategic Government & Defence Supply Solutions

Yuan Limited supplies specialized equipment, systems, and logistics solutions to government institutions, defence organizations, security agencies, and law enforcement bodies — partnering with internationally recognized manufacturers while maintaining high standards of quality, professionalism, confidentiality, and regulatory compliance.

Uniforms & Apparel

Tactical Equipment

Protective Gear

Capabilities

- Military & tactical equipment
- Uniforms, fabrics & footwear
- Bulletproof & protective gear
- Police & security equipment
- Medical non-drug products & equipment
- Food & field rations supply
- Hardware & general products
- Logistics, warehousing & procurement support

Capability Detail

Command, Control & Field Support

Command, control, communication and surveillance systems, border security solutions, security screening systems, tactical communications, emergency response equipment, engineering equipment, aviation support equipment, maritime security equipment, ammunition storage and handling solutions, and field medical units.

Medical Equipment

Logistics & Warehousing

Food & Field Rations

Logistics & Procurement

Our supply chain capability spans import, clearing and forwarding, warehousing, transportation and distribution, government procurement processes, and turnkey project implementation — ensuring reliable delivery from sourcing through to end use.

Why Choose Yuan

01

Diversified Capability

Mining, energy, and strategic supply under one roof — a single, reliable partner across critical sectors.

03

Trusted Partnerships

We work with internationally recognized manufacturers to source and deliver dependable products.

05

Professionalism & Confidentiality

Especially critical in government and institutional engagements, where discretion matters.

02

Quality & Compliance

Strict safety, quality, and regulatory standards guide every division's operations.

04

Kenya-Based Delivery

Local presence and understanding of Kenya's regulatory and operating environment.

06

Environmental Responsibility

Environmental management and rehabilitation built into our resource-based operations.
